Leaving the carbon in the ground: The role of GDP growth and fossil resources for climate protection

UNFCCC SB38 Bonn Side Event
Thursday 13 June 2013
18:30 - 20:00 Room Metro (MoT)

Economic growth, fossil fuel availability, and the timing of climate policy influence climate change mitigation outlooks in developing and developed regions. We will discuss insights on the interplay of these factors from leading integrated assessment models from the EU, US and China.

Opening remarks

Lars Grotewold, Stiftung Mercator

Climate Change Programme Director at Stiftung Mercator

Science-based assessment of international climate policy

Ottmar Edenhofer, PIK, MCC

Deputy Director of the Potsdam Institute for Climate Impact Research; Director of the Mercator Research Institute on Global Commons and Climate Change

Requirements of climate stabilization

Elmar Kriegler, PIK

Vice Chair of Research Domain Sustainable Solutions at the Potsdam Institute for Climate Impact Research

African and land use perspectives on climate mitigation

Katherine Calvin, PNNL

Research Scientist at the Pacific Northwest National Laboratory

Transformation implications for China

Jiang Kejun, ERI

Director of Research Management and International Collaboration Division at the Energy Research Institute

Moderation

Ioanna Mouratiadou, PIK

Research Scientist at the Potsdam Institute for Climate Impact Research
